Thursday, October 20, 2016 ~ 4:00 pm
112 Algonquin Road

AGENDA

1. Call to Order & Roll Call

2. Public Comments

4. Discussion Items
   4.1 2017 Roads & Bridges - Budget Discussion
   4.2 Oak Knoll Road Drainage
   4.3 Longmeadow Parkway Update

5. Adjournment

Chairman: Brian Cecola

NOTICE AS POSTED
1. ORGANIZATIONAL: The meeting of the Village of Barrington Hills Roads & Bridges Committee was called to order by Chairman Cecola at 4:02 PM.

2. PUBLIC COMMENTS: None.

3. APPROVAL OF MINUTES: The minutes of the Roads & Bridges Committee Meeting of August 25, 2016 were approved as written.

4.6 2016-2017 SNOW PLOWING UPDATE (MOVED TO TOP OF AGENDA): Commissioner Marks reviewed the Township policy regarding mailbox replacement during snow removal operations and advised residents to check the condition of their mailbox prior to the start of snow removal season. Trustee Gohl noted that this policy applies to Village maintained roads only. Commissioner Marks noted that the Township would be clearing roadside trees and vegetation in preparation for the season as that can affect the ability of the trucks to clear the pavement. Commissioner Marks also reviewed the call out policies and procedures. In response to a question from Chairman Cecola, Mr. Kosin noted that the Village’s IGA includes a fixed cost for snow plowing and an additional material cost based on the amount of salt and deicing liquid applied to the roadway. Commissioner Marks noted that salt had been procured for the year for a total of 1,000 tons in storage, with 2,500 tons purchased and an option for an additional 500 tons if needed. Commissioner Marks noted that salt prices are expected to come down from approximately $70 in 2015 to 20-25% lower in 2016.

4.1 VETERANS’ CROSSING CONSTRUCTION UPDATE: Mr. Strahan noted that the bridge has been open for a just over a month. Mr. Kosin noted that benches are being considered for installation at the Veterans’ Crossing memorial, with a potential dedication ceremony on November 11. It was noted that two contract items as well as minor punchlist work remained to complete the project. Chairman Cecola noted that he had received an email requesting stop bars be placed at the intersections adjacent to the bridge. Trustee Gohl noted the sight distance limitations at these intersections. Mr. Kosin noted that Cuba Township would be clearing the intersection and that the signs at the intersection would be replaced. Mr. Strahan noted that the pavement marking program had begun, and that it may be possible to have the contractor add stop bars at this intersection as an addition to the contract.
4.2 2016 ROAD PROGRAM UPDATE: Mr. Strahan noted that the contract work was complete with minor punchlist landscaping items remaining. The contract total is expected to be just under the budgeted amount of $912,000.00. It was noted that reimbursement for damages on Lakeview Lane was in process. Mr. Strahan noted that GHA is working with Lorig to get the first pay request for the project submitted.

4.3 PRELIMINARY BUDGET- 2017 ROAD PROGRAM: Mr. Strahan reviewed budgeted expenditures in 2016 and noted the 2017 budget was likely to be discussed in October. Mr. Kosin noted that MFT funds may be limited depending upon the state’s action relative to the budget. Mr. Strahan noted that two roads originally scheduled in 2017 had been moved up and completed in 2016 due to low bid prices and reviewed the remaining roads for consideration. The Committee also reviewed the status of the Cuba Road Bridge Restoral Expense line item of the budget. Chairman Cecola recommended that the line item remain and some contribution be made on an annual basis.

4.4 OLD HART ROAD BID RESULTS: Mr. Strahan noted that eleven bids had been received for construction of a proposed culvert on Old Hart Road. The low bid had been received from Copenhaver Construction in the amount of $29,936.00. Mr. Strahan noted that based on previous discussions with a contractor prior to the bid, the anticipated cost was $15,000-$20,000. Mr. Strahan noted that the bids would be reviewed and presented to the Village Board for consideration. Mr. Strahan also reviewed coordination efforts with the existing homeowners and the Barrington Hills Riding Club.

4.5 CHURCH ROAD ROW DEDICATION: Mr. Strahan reviewed previous discussions regarding this project, which called for dedication of right-of-way along the east side of Church Road as part of the Barrington Hills Farm project. Mr. Kosin noted that the parcel was located in unincorporated McHenry County, while the roadway is maintained by Barrington Hills. It was noted that a resolution to accept the right-of-way would be considered at the Village Board meeting. Chairman Cecola requested clarification on the process. Mr. Strahan noted that a similar application with two driveway access had been received in the past for a property to the north on Church Road, and the same process was followed requesting that the applicant demonstrate adequate sight distance for the second driveway. Mr. Strahan summarized the results of the sight distance review and noted the options provided to the permit applicant and the current status of access design.

5. ADJOURNMENT: The meeting was adjourned at 5:08.
MEMORANDUM

To: Robert Kosin, VBH Director of Administration
   Brian Cecola, VBH Chairman Roads & Bridges

The following is a summary of the recommended budget amount for each line item of expenditures.

### Road Maintenance Contracts

The largest component of the Roads & Bridges fund is typically the Road Maintenance Contracts line item. The Village has taken advantage of recent low bid prices, moving up Hawthorne Lane and River Road, both originally scheduled in 2017, to 2016.
Below is a list of the remaining roads originally scheduled for resurfacing in 2017 and 2018, in order of ascending Pavement Condition Index (PCI) as measured during the 2015 pavement inventory:

<table>

</tbody>
</table>

*"Length" given for Village Hall Parking Lot is an equivalent roadway length for a 20' wide road with the same surface area as the asphalt parking lots at the Village Hall.

Consideration could be given to delaying resurfacing on Chapel Road and Church Road, given the anticipated construction of the Barrington Hills Farm project at the intersection of Chapel & Church, in which case it may make sense to rearrange the order of the roads above. The initial budget projection below assumes that resurfacing is not delayed but based on the pavement condition ratings.

**TOTAL:** 15,925= 3.02 Miles $984,000.00

The Village also has MFT funds available for use in 2017 if desired. The MFT fund balance as of August 31, 2016 was $143,582.61.

**Snow Plowing Contracts**

Snow plowing expenses, as established through the IGA with Cuba Township, are based on an annual fee (billed in six installments between November and April) that increases 3% annually in addition to the cost of materials which is billed separately. The budgeted amount was raised from $200,000 in 2014 to $260,000 in 2015 based on exceeding the budgeted amount in 2014 (actual spent was $206,444.76) and increases in unit prices provided by Cuba Township. The total spent during the 2015 budget year was $204,032.57. Based on spending to spending on this line item for the 2016 budget year is expected to be below $200,000.00.

Based on previous expenses during above average winters and the current reduction in salt prices, we recommend the amount budgeted for Snow Plowing Contracts be reduced from $240,000.00 to $220,000.00.

Gewalt Hamilton Associates, Inc. – Page 2
Mowing/Cleanup Contracts
This line item reflects costs for roadside mowing contracts as well as tree and brush cleanup after storm events. As a result, expenditures can fluctuate based on the number of severe storm events in a given year. Based on the December 2015 Treasurer’s Report, expenditures in 2014 and 2015 totaled $40,015.00 and $66,767.75, respectively.

We would recommend the budgeted amount for 2017 be $40,000.

Sign Purchase/Installation
Typically, $12,000-$14,000 is budgeted to cover replacement of various signage and miscellaneous requests over the course of the year. Based on the December 2015 Treasurer’s Report, expenditures in 2014 and 2015 totaled $8,412.87 and $15,387.46, respectively.

We recommend the budgeted amount for 2017 be $12,000.

Drainage Management
The 2016 budgeted amount was minimal as no significant drainage improvement projects were anticipated. The Roads & Bridges Committee meeting will include discussion of existing drainage conditions along Oak Knoll Road and Old Hart Road. We recommend a budget amount of $40,000 to cover any minor drainage improvements or culvert replacements that may be required.

Engineer Fees
Typically this budget amount covers engineering fees for design and construction of the road and drainage programs, associated resident coordination, Roads & Bridges meetings, and various other tasks that arise over the course of the year. The amount budgeted for 2016 for these tasks included a base amount of $180,000.00, as well as an additional $135,000 for a potential joint project with the Cook County Division of Transportation & Highways to design roadway improvements on Brinker Road. This project did not move forward. Engineering expenses totaled $170,448.12 in 2015 and are anticipated to be below this amount in 2016.

We recommend the budgeted amount for 2017 be $180,000.

Road Striping
As discussed earlier this year, there is typically a bi-annual road striping program to refresh the pavement markings on specific higher volume roadways in the Village, which occurred this year. Typically $25,000.00 is budgeted for this work, while during “off years”, $1,000 is budgeted in case minor touch-ups are needed.

As the pavement marking program was completed in 2016, we recommend the budgeted amount for 2017 be reduced to $1,000.00.

Equipment Maintenance
Traditionally $4,000 has been budgeted to cover annual maintenance costs for the solar mobile speed sign; however, the sign was not utilized in 2015 or 2016 as Cuba Township has their own unit. A nominal $1,000.00 was budgeted for this line item in 2016 and has not been used to date.

We recommend the budgeted amount for 2017 be $1,000.

Road Patching Contracts
The amount budgeted typically covers cold patching completed during the winter and early spring or under emergency circumstances and are typically coordinated by Village staff. This patching is separate from the patching completed during the annual road program. The budget is typically driven
by late winter/early spring weather conditions as freeze thaw cycles damaged susceptible pavements and expenditures are variable.

Based on the December 2015 Treasurer's Report, expenditures in 2014 and 2015 totaled $4,303.75 and $29,882.59, respectively. We would recommend maintaining the budgeted amount for 2017 be $20,000.00.

**Equipment Purchases**
No specific equipment purchases were anticipated or have been made in 2016. We recommend a budget amount of $1,000 to cover any minor purchases that arise during the year.

**Bridge Inspections**
The Village maintains four bridges that require bi-annual inspections. All four bridges have been or will be inspected by the end of 2017. During years when the bi-annual inspections are not required a smaller amount is budgeted to cover any minor inspection requirements that may arise.

We recommend the budgeted amount for 2017 be $1,000.

**Cuba Road Bridge Restoral Expenses**
The Veterans’ Crossing project is substantially complete, although tree replacement will not be completed until the spring of 2017. As a result, the final pay request is anticipated in 2017. The Roads & Bridges Committee also discussed re-naming this fund and setting aside an amount annually for bridge repairs and replacement this is available when needed.

We recommend the budgeted amount for 2017 be $10,000.00 to cover final costs for the Veterans’ Crossing project. This amount can be increased if the Committee desires to begin setting aside funds for future bridge repair and replacement costs.
MEMORANDUM

To: Robert Kosin, VBH Director of Administration
   Brian Cecola, VBH Chairman Roads & Bridges

Re: Oak Knoll Road Drainage

At the September Village Board meeting, Trustee Konicek questioned why a project on Old Hart Road had been taken out to bid when drainage improvements along Oak Knoll Road had not been pursued. Based on further discussion, the questioned centered around two adjacent drainage issues on Oak Knoll Road: (1) An existing drain tile crossing Oak Knoll Road from 235 Oak Knoll Road to 238 Oak Knoll Road, and (2) An existing depressional storage/wetland area at 20469 Mid Oaks Lane. A summary of actions taken to date in each area are provided below:

235/238 Oak Knoll Drain Tile

In 2003 GHA was contacted by Scott Sinnett, a contractor working for the upstream property owner (237 Oak Knoll Road). Mr. Sinnett had replaced an old clay drain tile up to Oak Knoll Road and obstructions remains, so requested the Village replace the portion crossing Oak Knoll Road. This work was completed in 2004 with replacement of the existing 8” clay with 12” RCP from the south edge of the easement to the north edge of the easement.

Subsequently our office has met with the downstream property owner (238 Oak Knoll Road) on a few occasions, most recently in 2015. The property owner had contacted Trustee Koniceck, who had forwarded his email and requested that we contact him. The attached email summarizes our correspondence with the property owner. There are legal options he could pursue as well as a relatively small fix of the existing drain tile that would address his issue of water ponding south of the driveway.

20469 Mid Oaks Lane Depressional Area

Along the east half of the property at 20469 Mid Oaks Lane there is a small wetland area that adjoins Oak Knoll Road. During significant storm events and during the spring thaw, the water level rises within the wetland area and comes close to the south edge of Oak Knoll Road. The water recedes very slowly as there is no apparent gravity outfall for the area. In the past the property owner has used a pump to draw the water level down. GHA met with the property owner in 2013 and agreed to complete a drain tile survey to investigate the claim that 2004 drain tile work described above had somehow caused his pond to stop draining. The attached drain tile survey demonstrates that the wetland has only one outlet, a drain tile directed north across Oak Knoll Road towards Flint Creek, which has likely become clogged and inoperable over time.

Past Roads & Bridges chairs have elected not to pursue drainage improvements at this location. The Village could replace the portion of the drain tile within Oak Knoll Road, as was done for the drain tile to the east between 235 and 238 Oak Knoll. However, in this case it is unlikely that replacing only this portion will restore the functionality of the drain tile. Another option would be to construct a storm sewer
down Oak Knoll Road, draining this depressional area into the existing ditchline on the south side of Oak Knoll Road towards the golf course. However, this ditchline drains west toward the Barrington Hills Country Club golf course, an area in which the roadway has overtopped substantially during heavy rainfall events.
Billman Property Flooding

On Tue, Aug 4, 2015 at 12:44 PM, Dan Strahan <dstrahan@gha-engineers.com> wrote:

There are a couple of distinct drainage issues referenced in the emails. First regarding the drain tile crossing through Mr. Billman's property (238 Oak Knoll), attached is an excerpt from the atlas page that shows the overall length of the tile in question between 235 Oak and 238 Oak Knoll. The purple segment by the road was replaced by the Village in 2004 as discussed in the email that Bob had attached. Though the parcels on the atlas don't reflect it, there is no dedicated right-of-way through Oak Knoll Road at this location. Catch basins were placed along the length of the pipe at approximately 33' from the centerline of Oak Knoll on either side, and the existing clay pipe was replaced with concrete. While it is possible that this segment may be clogged or causing a problem now, the problem would show up on the south side of the road rather than Mr. Billman's property. If there is a blockage that is resulting in flooding on Mr. Billman's property it is most likely caused by a portion of the pipe outside of the Village's easement, but further detail on the nature of his complaint would be helpful.

We've had a number of conversations with Mr. Mielke over the years and ultimately had Huddleston McBride prepare a drain tile survey in 2013. Mr. Mielke's contention had been that the project referenced above resulted in a blockage to a line that drains his pond to the east. The drain tile survey found that there is only a line heading north out of his pond, which would not have been affected by the Village's project. While the Village could replace the portion across Oak Knoll, there remains a lengthy distance north of Oak Knoll that would also need to be maintained to drain this pond.

Dan

On Mon, Aug 3, 2015 at 2:20 PM, Robert Kosin <rkosin@barringtonhills-il.gov> wrote:

Understood but as you have been told there is more local history than research, and that is what will be provided from the Village Engineer.

Until more information is provided from those records, here are some givens...
There is no Village rights of way on Oak Knoll Road from Buckley east to Old Hart but for the portion between Paganica and Mid-Oaks Lane which is a dedicated ROW.

A storm sewer atlas has been created pursuant to the NPDES program and the sheets pertaining to Oak Knoll Road will be retrieve. Sewers or culverts as found within the ROW or under the pavement are added to the atlas. If culverts require repaired, they are replaced in-kind but most often with concrete rather than galvanized metal.

Culvert clean-outs, ditch maintenance and general drainage work is invoiced and reviewed with the Chairman of Roads & Bridges.

On Mon, Aug 3, 2015 at 1:47 PM, Colleen Konicek <ckonicek@barringtonhills-il.gov> wrote:
Please keep me in the loop as to what you find.

My understanding from talking to Earl, and he is generally good on his history, particularly that involving his own property, is the village erected a culvert on his property that should have been erected on the village's right-of-way, but someone made a mistake and put it on his property. He believes that may be blocked. Thus, as I said, if it involves more than checking the culvert for any blockage, please do no engage in any activity on his property without consulting him first.

With respect to the Mielke's property, they have stopped me on the road and asked questions about the flooding at their location, as well. I can tell you from having lived on that road since I was in 4th grade that that area did not flood until the last 10 years or so. Something happened to change it.

Attached find a description of the drainage history in the area of the Billman property. All in all remnants of the drainage system of Hart Hills Farms.

By copy to the Village Engineer and current Chairman of Roads & Bridges can advise as to the what if any activities of the Village in that area of Oak Knoll occurred to-date and convey to the property owner.

On Mon, Aug 3, 2015 at 9:26 AM, Colleen Konicek <ckonicek@barringtonhills-il.gov> wrote:
Dan & Bob: A friend and neighbor, Earl Billman (Oak Knoll Rd., 3 drives east of Paganica - I'll get back to you with the exact address) contacted me the other day regarding standing water in his front yard. He has a couple theories as to why this is a recent phenomenon, one being that the drainage that the village installed on his property several years ago is blocked. It's my understanding from our prior conversations that it is the village's responsibility to make sure that these drainage areas are kept clear and free flowing. If that's the case, please have somebody go out and check the drainage on Earl's property. Also, it is my understanding from my conversations with Earl that the village made a mistake when it installed the drainage and improperly placed it on Earl's right of way. As such, if there is any work that needs to be done as a result of the inspection that could potentially impact his property he would like to be contacted in advance of any of that work taking place.

Re: Longmeadow Parkway

The Village received notice last week that the Kane County Transportation Committee would consider a resolution, “Designating Municipal Extensions of Kane County Highway No. 86 (Longmeadow Parkway) at their October 18th, 2016 meeting. Village staff contacted Mr. Steve Coffinbarger (Asst. Director of Transportation for Kane County) last week for clarification as the language of the resolution was unclear as to its intended affects and appeared to be incorrect with regards to Autumn Trail, which was characterized as a Village street.

Mr. Coffinbarger spoke with Bob Kosin and I and clarified that the County will maintain jurisdiction over Longmeadow Parkway after construction. Bob and I pointed out that Autumn Trail is a privately maintained roadway and recommended revisions to the ordinance language to clarify this. Mr. Coffinbarger stated that he was not aware of this jurisdiction and would review the resolution with County staff to affect the required revisions. Mr. Coffinbarger later followed up via email, stating that since Autumn Trail was dedicated and the IDOT database shows it as a Village street, the Assistant State’s Attorney did not feel any revision to the ordinance was required.

Kane County is currently anticipating a January 20, 2017 letting (bid opening) date for the project. To maintain this schedule would require that any right-of-way acquisition be certified by November 30, 2016.
Resolution No.
Designating Municipal Extensions of Kane County Highway No. 86 (Longmeadow Parkway)

Committee Flow: Transportation Committee, Executive Committee, County Board

Summary:
Phase II Engineering and right of way acquisition continue for the remainder of the Longmeadow Parkway corridor with a significant portion of that effort now complete. As part of the upcoming construction phases, the County is designating that portion of the corridor as a municipal extension of Kane County Highway No. 86 (Longmeadow Parkway) within the Villages of Carpentersville and Barrington Hills in accordance with Illinois Highway Code.
RESOLUTION NO.

DESIGNATING MUNICIPAL EXTENSIONS OF KANE COUNTY HIGHWAY NO. 86 (LONGMEADOW PARKWAY)

WHEREAS, the County of Kane, in coordination and cooperation with northern Kane County municipalities, has since the early 1990’s planned for a crossing of the Fox River by way of a bridge located in the vicinity of Bolz Road in Carpentersville, Illinois; and

WHEREAS, in order to make the movement of traffic across the bridge safe, effective and efficient, the County of Kane has planned for highway approaches to the proposed bridge across the Fox River from the east and the west; and

WHEREAS, the approaches to the proposed bridge have been referred to as the Longmeadow Parkway Corridor which extends from the Huntley/Boyer Road intersection to the west to the intersection of Autumn Trail and Illinois Route 62 to the east; and

WHEREAS, the Longmeadow Parkway Corridor is comprised of existing State and County highways and municipal streets and also includes new segments of new highway on new locations; and

WHEREAS, the Federal Highway Administration (FHWA) and the Illinois Department of Transportation (IDOT) have approved the alignment of the Longmeadow Parkway Corridor; and

WHEREAS, the County of Kane is authorized by the Illinois Highway Code, (605 ILCS 5/5-106) to, with the approval of IDOT: (i) cause various municipal streets to become municipal extensions of County highways and (ii) designate a route for a municipal extension of a county highway on a new location within a municipality; and

WHEREAS, the Village of Barrington Hills and the Village of Carpentersville are municipalities located in whole or in part within the boundaries of the County of Kane; and

WHEREAS, Autumn Trail is an existing street in the Village of Barrington Hills, Illinois; and

WHEREAS, the County of Kane desires to designate that part of Autumn Trail within the limits of the Village of Barrington Hills as described in Exhibit “A” attached hereto as a municipal extension of Kane County Highway No. 86 (also known as “Longmeadow Parkway”) in order to end Kane County Highway No. 86 at Illinois State Route 62 within the Village of Barrington Hills; and

WHEREAS, the County of Kane additionally desires to designate that area within the limits of the Village of Barrington Hills as described in the Exhibit “B” attached hereto as a municipal extension of County Highway No. 86 (Longmeadow Parkway) on a new location in the Village of Barrington Hills in order to end Kane County Highway No. 86 at Illinois State Route 62 within the Village of Barrington Hills; and

WHEREAS, the County of Kane further desires to designate that area within the limits of the Village of Carpentersville as described in the Exhibit “C” attached hereto as a municipal extension
of County Highway No. 86 (Longmeadow Parkway) on a new location in the Village of Carpentersville in order to form a continuous route for Kane County Highway No. 86 (Longmeadow Parkway) through the Village of Carpentersville.

NOW, THEREFORE, BE IT RESOLVED by the Kane County Board that the portion of the Village of Barrington Hills’ street known as Autumn Trail described in Exhibit A attached hereto is hereby designated a municipal extension of Kane County Highway No. 86 (Longmeadow Parkway) in order to end Kane County Highway No. 86 at Illinois State Route 62 within the Village of Barrington Hills so as to best serve traffic needs.

NOW, THEREFORE, BE IT ALSO RESOLVED by the Kane County Board that the area within the limits of the Village of Barrington Hills as described in the Exhibit “B” attached hereto is hereby designated as a municipal extension of Kane County Highway No. 86 (Longmeadow Parkway) on a new location in the Village of Barrington Hills in order to end Kane County Highway No. 86 at Illinois State Route 62 within the Village of Barrington Hills so as to best serve traffic needs.

NOW, THEREFORE, BE IT FURTHER RESOLVED that the area within the limits of the Village of Carpentersville as described in the Exhibit “C” attached hereto is hereby designated as a municipal extension of County Highway No. 86 (Longmeadow Parkway) on a new location in the Village of Carpentersville in order to form a continuous route for Kane County Highway No. 86 (Longmeadow Parkway) through the Village of Carpentersville so as to best serve traffic needs.

Passed by the Kane County Board on November 8, 2016.
